Dear Susan and Nikos,

1. Leo's upper front teeth sit a little further forward than his lower front teeth — this is very common at his age, and it's something we'll guide into a better position as his teeth come in. The lower teeth are slightly crowded, which means there isn't quite enough room for all of them to line up neatly right now.
2. Leo's upper front teeth sit a little further forward than his lower front teeth — this is very common at his age, and it's something we'll guide into a better position as his teeth come in. The lower teeth are slightly crowded, which means there isn't quite enough room for all of them to line up neatly right now.
3. Leo's upper front teeth sit a little further forward than his lower front teeth — this is very common at his age, and it's something we'll guide into a better position as his teeth come in. The lower teeth are slightly crowded, which means there isn't quite enough room for all of them to line up neatly right now.
